The authors regret that an error occurred in Section 3.1 (Design of a complex nutrition quality model) of the article. The following sentence mistakenly listed polyunsaturated fatty acids instead of saturated fatty acids: “On the other hand, negative nutrients remained the same: sodium (Na) and polyunsaturated fatty acids (PUFAs) were included whereas added sugar was omitted since it is not of interest in this type of

foodstuffs.”

The article should state: “On the other hand, negative nutrients remained the same: sodium (Na) and saturated fatty acids (SFAs) were included whereas added sugar was omitted since it is not of interest in this type of foodstuffs.”

The authors would like to apologise for any inconvenience caused.
